Our Commitment to Patient Safety

We recognize that our staff plays an important role in preventing medication errors. To enhance your safety, we use a variety of robotics and systems to ensure your prescription is appropriate and accurately filled.

The Pharmacy Data Transaction Service (PDTs) enhances patient safety by integrating a patient's medication profile from all pharmacy points of service within the Military Health System (e.g., WAMC, TMOP, and retail network pharmacies). By virtue of establishing one central patient medication profile, providers can review the complete medication history and therefore reduce one's exposure to unnecessary medication risk.

WAMC Pharmacies also participate in the US Pharmacopeia MedMarx Program. This is an Internet-accessible database that is used as a risk-reduction tool for hospitals to report, track, and compare medication error data in a nationally standardized format. By virtue of analyzing reported medication error reports in relation to the medication use system (e.g., prescribing, dispensing, monitoring, etc.), we can prevent future medication errors.

We Care!

We seek to delight you with our care and service. When we succeed, please tell the world. If we disappoint you, please tell us so that we can continue to improve our service for you, your loved ones, and our other guests. We will make every effort to solve your concern when it occurs and before you depart our area. Our chain-of-command remains ready to respond to your needs when requested.

Understanding Your Pharmacy Benefit

Department of Pharmacy

WOMACK ARMY MEDICAL CENTER

Fort Bragg, NC 28310

WELCOME!

The Womack Army Medical Center (WAMC) Department of Pharmacy would like to thank the more than 180,000 beneficiaries eligible to patronize our pharmacy. Our commitment to you is nothing less than our best. We continuously strive to and seek to implement new programs that improve both the quantity and quality of our services. We appreciate the opportunity and privilege to serve you. Thank you!

Our Mission

To provide accessible, high-quality pharmaceutical care and services, education and training, and leadership in support of Womack Army Medical Center.

Our Vision

To serve as the Army's Pharmacy of Excellence and choice of our beneficiaries as a result of our:

- Delivery of quality pharmaceutical care;
- Commitment to customer service;
- Design and management of a fail-safe medication use system;
- Provision of evidenced-based drug therapy education and training; and
- Leadership and management of the pharmacy benefit.

Why Choose a WAMC Pharmacy

We recognize that you have a choice regarding where you obtain your prescription medications and we want to be that choice! Why then choose a WAMC Pharmacy instead of the TRICARE Mail Order Pharmacy (TMOP) or a retail network pharmacy? Here are four simple reasons: convenient locations, convenient hours, first class customer service, and simple economics!

We operate five pharmacies conveniently located throughout Fort Bragg. Our operating hours of each of these pharmacies compete favorably with our civilian counterparts.

Beyond that, we offer you first class service! Periodically, we post the results of our patient satisfaction surveys. The results have been outstanding! Our pharmacy staff also plays a vital role in protecting and improving your health. Patient safety is paramount to accomplishing our mission.

Lastly, and best of all, whenever you obtain a medication from one of our pharmacies, you pay absolutely nothing!

Your Other Pharmacy Options!

While we encourage all eligible beneficiaries to use a WAMC pharmacy, you retain options when a WAMC pharmacy does not work for you. For a minimal copayment, beneficiaries have the option to have their prescription filled at a retail network or the TRICARE Mail Order Pharmacy (TMOP). You also have the option to use a non-network retail pharmacy, but may pay higher costs. The following table is intended to identify your costs at the various pharmacy points of service in order to assist you with your decision and selection of a pharmacy.

Pharmacy	Generic drug cost	Brand name drug cost
MTF	\$0	\$0
TMOP	\$3 (90-day supply)	\$9 (90-day supply)
Retail pharmacy	\$3 (30-day supply)	\$9 (30-day supply)
Non-network retail	\$9 or 20 percent of the drug cost (whichever is greater)	

TRICARE Mail Order Pharmacy (TMOP)
